

Model shown has Infrared upgrade installed (AFA-IR/HF)

Optional Extra's

- o Infra-red trigger devices

Description:

As its name implies, the Affray Unit is ideal for installations where a disturbance or scuffle may occur. Typical applications include law courts, police cells, detention centres, social security offices etc., where staff are vulnerable or at risk of being attacked by those around them.

It's perfectly suited for crisis situations as the big red emergency button is designed to be easily triggered and once the call has been initiated it can only be cleared by authorised personnel like the manager who would have the reset key.

There is also visual confirmation by means of the red comfort LED on the front of the unit that flashes once the unit has been triggered. This confirms to the staff member that an alarm call has been activated and help is on the way.

Optional extra's for this unit to trigger an assistance call could be –

- o ARM infrared call point upgrade to allow infrared keyfobs/belt clips to be used

Levels of Call:

- o Emergency (Affray)
- o Reset
- o Low Battery

Technical Specification:

- o Reassurance LED and comfort tone
- o Factory set unit identity plus fully supervised monitoring
- o Conforms to BS6799 Class VI
- o Effective radiated power: 10mW integral aerial, approved to MPT1344 (licence exempt)

In pursuance of a policy of continued improvement, the company reserves the right to change the design and specification without prior notice
